DETAILED ACTION

The claims 1-20 are pending in the instant office action.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, 12-19, drawn to a Pks13 protein comprising SEQ ID NO: 1 from *Mycobacterium tuberculosis*.

Group II, claims 5-8, 20, drawn to vector, host cell expressing a polynucleotide encoding protein of SEQ ID NO: 1 and method of preparing protein of SEQ ID NO: 1 using said host cell.

Group III, claim 9, method of inhibiting the biosynthesis of mycolata envelope in a bacteria by inhibiting the expression of the protein of group 1.

Group IV, claims 10-11, method of screening an antibiotic against a bacteria that capable of synthesizing mycolic acid.

The inventions listed in Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical features of Groups I and II are products. The polypeptide of group I has distinct structure, function and properties that is not shared by DNA, vectors and host cell of group II. Therefore group I and II do not share their technical features.

The technical feature of Group III and IV are the method steps using particular reagents, in this case protein of group I, a feature which is not shared with group II claims. Thus, the technical feature of Group II is not shared with group III and IV. Group I and groups III-IV share a technical feature, a product , Pks13 protein.

However the technical feature linking group I-IV, Pks13 protein of claim 1, do not constitute a "special technical feature" as defined by PCT Rule 13.2, because it does not claim a feature which defines a contribution over the prior art as Pks13 protein is taught thorough Accession NO: XP-002314378 (from IDS (taken from ref: Cole et al. Nature 1998, pp 537-544)).

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
